JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

the captain, and his own observations and alterations for improving the service which his experience may suggest to him in the passengers' interest.

Such log book shall be numbered, stamped, and signed by the harbor master at port of sailing, and shall be written out without any vacant spaces or erasures, and shall be closed and signed every twenty-four hours.

The government surgeon and the captain shall agree about the regulations for the discipline on board in respect of hours for rising, cleaning out of the compartments, meals, allowing passengers on deck, medical visits, general silence, and filling up of tubs with fresh water from time to time as prescribed.

Respectfully,

J. M. EAGER,
Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

NEW BRUNSWICK.

Smallpox at St. John and vicinity.

ST. JOHN, NEW BRUNSWICK, December 10, 1901.

SIR: In reference to the smallpox situation here at present, I beg leave to report that during the epidemic there have been 76 cases of the disease in the city and suburbs, with 19 deaths. During the week ended December 8, 16 new cases were reported and 3 additional cases yesterday, but none to-day.

Apart from this immediate vicinity, scattering cases traceable to St. John are reported from 5 other localities in the province, to wit, St. Marys (near Fredericton), St. George, Waasis (suspect), Moncton, and Jemsig. There is still a large unvaccinated population in St. John as well as throughout the province. As yet there has been no systematic effort on the part of the authorities of this city to furnish free vaccination to those applying * * * .

The epidemic is not confined to any one locality and exists also among the seafaring population. The United States consul's records show that 65 vessels cleared from here for United States ports during the month of November and it is estimated that between 40 and 50 will clear this month.

The crews of these vessels are now fairly well vaccinated, but as their crafts pass slowly along the coast from harbor to harbor there is a special element of danger to small seaports from an infected vessel of this sort.

Respectfully,

M. VICTOR SAFFORD,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Smallpox at St. John decreasing.

ST. JOHN, NEW BRUNSWICK, December 14, 1901.

SIR: I beg leave to report that there has been a marked decrease in the number of new cases of smallpox here this week. Only 2 new cases and 1 death have occurred during the last six days, while the number of cases for the preceding week was 16. The total number of cases reported in St. John and vicinity up to date is 78 with 20 deaths. There has also been a decided improvement in the methods of handling the disease,
